

KICK DRUM

LEVEL 1

Benefits

- Fundamental to Beats
- Give the Power and Punchiness

Control

- Lips and Lungs

Steps

- 1 Purse or press your lips together in the middle
- 2 Push out air like P (aspirated, instead of B)

Problems & solutions

- 1 Soft
 - Lips spread too thin
 - No lung use - blow like a ballon/candle
 - Laughing with your lips tight in middle
 - Put your fist in front of your mouth, build up air and release
- 2 Too airy/ Dubbly
 - Shorts Bursts
 - Keep your lips Closed after the sound
- 3 Fart-ish Sound
 - Separate Your Teeth, Drop your Jaw Slightly

Direction

Refine the sound, get it as clean and strong as possible so you sound more like a drum get and less like a human

Pro Tips

- Use a mirror! Look at your mouth shape it helps!
- Find the balance between lip pressure and lung power
- The air from your mouth/ lungs is like the engine. The wheels(lips) must move in sync with the engine
- Go from Soft to Loud
- Humming Variation

Practice Exercises

- 112 BPM , till failure
- Soft to Load cycles
- Exercises from Cypher
